ABOUT ME

Performance-oriented Digital Marketing Analyst with hands-on experience in paid media campaign execution, A/B testing, and data-driven audience targeting. Google Ads certified across Search, Display, and Video — with a strong analytical foundation in campaign performance reporting, multi-source marketing data analysis, and KPI dashboard development. Experienced in translating marketing data into actionable insights that improve targeting precision and campaign efficiency. Self-motivated, deadline-driven, and eager to contribute to a high-performance biddable media team at scale.

Core Competencies: Google Ads (Search, Display, Video) • Paid Media Campaign Management • A/B Testing • Campaign Performance Analysis • Audience Targeting • KPI Reporting • Data Analysis (Python, Power BI) • Client Communication • Process Improvement

EXPERIENCE

House of Panache UAE — Marketing & Business Data Analyst

Sept 2025 - April 2026

- Executed **data-driven outreach campaigns** (100+ targeted emails daily), applying **A/B testing** to optimize audience targeting and **lead acquisition** efficiency — generating **3,000+ qualified B2B opportunities**.
- Analyzed **campaign engagement metrics** and **performance data** across multiple channels, **identifying behavioral patterns** that improved targeting precision and outreach response consistency.
- Analyzed business and marketing datasets using **Python (Pandas, NumPy)** to **clean and consolidate multi-source data**, **reducing data preparation time by ~70%** and improving reporting accuracy; built **6+ interactive Power BI dashboards** visualizing **10+ business KPIs**, enabling stakeholders to identify performance trends and insights up to **4x faster**.

PROJECTS

Customer Funnel & Sentiment Analysis — E-Com Marketing Analytics | SQL, Python, NLP, Power BI

[GitHub](#)

Objective: Evaluated marketing funnel performance and campaign-driven customer feedback to improve conversion efficiency.

- Analyzed **end-to-end marketing funnel** using **SQL**, tracking conversion rates from **4.3% to 18.5%** and identifying product-driven seasonal spikes of up to **150%** — directly informing targeting and campaign timing strategy.
- Conducted **Python NLP sentiment analysis** on **357+ customer reviews**, quantifying **275 positive vs. 82 negative sentiments** and recommending improvements to **increase customer satisfaction beyond 4.0 ratings**.

Vendor Profitability & Dependency Risk Analysis — Retail Procurement Analytics | SQL, Python, Power BI

[GitHub](#)

Objective: Evaluated vendor profitability and procurement dependency to support strategic purchasing decisions.

- Developed **SQL ETL pipeline** integrating **6 procurement and inventory datasets** and conducted **Python EDA and statistical testing**, identifying **72% cost reduction from bulk purchasing** and **65% purchase dependency on top vendors**.
- Built **Power BI dashboard** visualizing **supplier margins and inventory risk**, identifying **\$2.7M unsold inventory** and enabling **vendor diversification and pricing optimization** insights.

Customer Churn Prediction & Risk Segmentation — Telecom Analytics | SQL, Python, ML, Power BI

[GitHub](#)

Objective: Analyzed telecom customer lifecycle data to identify churn drivers and build predictive retention insights.

- Analyzed **7,000+ customer records** using **SQL extraction and Python EDA**, identifying **~26–27% churn** and revealing **month-to-month plans driving ~1.4x higher churn risk**.
- Developed **Random Forest churn prediction model** using **Python (Scikit-Learn)**, achieving **~80% accuracy** and flagging **~15–20% high-risk customers**, estimating **~5–8% potential churn reduction** through targeted retention strategies.

EDUCATION

B.S.C COMPUTER SCIENCE

University of Mumbai

SKILLS

Marketing

Google Ads (Search, Display, Video) • Campaign Management • A/B Testing • Campaign Performance Tracking
• Lead Acquisition Optimization

Analytics & Reporting

Campaign Performance Analysis • Funnel Analysis • KPI Development • Power BI (DAX, Dashboards) • Excel
(Advanced Formulas, Power Query) • MIS Reporting

Data & Programming

Python (Pandas, NumPy — Data Cleaning, Multi-Source Consolidation) • SQL/MySQL • Exploratory Data Analysis

Soft Skills & Workflow

Client Communication • Cross-Functional Collaboration • Self-Starter • Deadline Management • Process
Improvement • Research & Knowledge Sharing

CERTIFICATES
